			EXEC. DEC.
MEMORANDUM FOR:	Chief, Planning Division, PF	RS/DDS&T	4 ACIFES
FROM:	Chief, Executive and Plannin	ng Staff	
SUBJECT:	Details of INTERNET Contract		
	requested in our telephone co		
	g to you the details of the IN Th may be useful in discussions		
	ad asked specifically the control The number is It	ract number and the was signed on a se	
	tember 1982 and is projected to		
	n, the contract is aimed at de	fining the scope a	nd needs
3. In sur of INTERNET. The bility of trans with procuring procedures neces the identified one which requires	The first phase of the contract sponder space, the technical as that space, specific satellite essary for obtaining and mainta space segment. The next phase ires the additional funds which	t will ascertain the discrete that the discrete that the discrete that the contract of FBIS now wants to	he availa- associated d the itment for -and the o apply to
3. In sum of INTERNET. To bility of trans with procuring procedures necesthe identified one which require the contractsite measurement	The first phase of the contract sponder space, the technical are that space, specific satellite essary for obtaining and maintage space segment. The next phase	t will ascertain the discrete that the discrete that the discrete that the contract of the desired system of the desired system.	he availa- associated d the itment for -and the o apply to stem, on-
3. In sur of INTERNET. The bility of trans with procuring procedures necesthe identified one which requires the contractsite measurement tation.	The first phase of the contract sponder space, the technical are that space, specific satellite essary for obtaining and maintant space segment. The next phase ires the additional funds which involves definition and design ints, engineering costs, scheduct	t will ascertain the degal problems are availability, and aining a firm common the contract of the desired systems, and procurements.	he availa- associated d the itment for -and the o apply to stem, on- ent documen-
3. In sur of INTERNET. The bility of trans with procuring procedures necesthe identified one which requires the contractsite measurement tation.	The first phase of the contract sponder space, the technical are that space, specific satellite essary for obtaining and maintal space segment. The next phase ires the additional funds which involves definition and design	t will ascertain the degal problems are availability, and aining a firm common the contract of the desired systems, and procurements.	he availa- associated d the itment for -and the o apply to stem, on- ent documen-
